Month in Cash: Economy continues to meander

June 1, 2015

The U.S. economy has been taking steps forward and backward since the financial crisis, but May's data might be better described as "sideways." We had a slight rebound from the poor first quarter, but certainly not any affirmation that the second quarter is going to be overly strong. Industrials were the most sideways, particularly with the differing data across the many city indexes. Some were up, some down and some didn't move much at all.

Housing was probably the most positive indicator in the month, although the labor market continues to improve, which leads to consumer-led economic growth. But inflation stubbornly continues to be benign, and that is what is pressuring the Federal Reserve to wait to raise rates. September is now the most likely policy meeting in which the hike will come. If we have resurgence in economic strength in June, a July meeting could be possible now that the Fed has implemented a conference-call capability. Chair Janet Yellen says the call will operate just like the press conference that would come following such a major announcement. It would certainly be a good test of that capability!

Yellen and other Fed officials have been repeatedly telling the market to focus more on the movement of rates beyond liftoff. Initially everyone was thinking there would be three hikes before the end of this year, but now many think there will be two. The thought is that rates would rise only every other FOMC meeting and pause for a period of time around 1%. That's quite possible, but it is really dependent on the overall economic performance.

On the positive side, although U.S. growth isn't rebounding as fast as we thought it could, other parts of the world are, including Europe.

Speaking of Europe, cash managers will be keeping an eye on a new regulatory proposal by the European Parliament that would compel off-shore money market funds to float their net asset values (NAV). Sound familiar? It's quite similar to the reforms implemented by the SEC last summer.

Like the SEC's rules, the European proposal has several exemptions: government funds that can invest in eurozone government securities; retail funds for consumers versus institutions; and "Low Volatility" funds, which invest in securities of up to

Definition of Weighted Average Maturity (1) & (2)

*(1) "WAM Days" is the mean average of the periods of time remaining until the securities held in TexPool (a) are scheduled to be repaid, (b) would be repaid upon a demand by TexPool, or (c) are scheduled to have their interest rate readjusted to reflect current market rates. Securities with adjustable rates payable upon demand are treated as maturing on the earlier of the two dates set forth in (b) and (c) if their scheduled maturity is 397 days or less; and the later of the two dates set forth in (b) and (c) if their scheduled maturity is more than 397 days. The mean is weighted based on the percentage of the amortized cost of the portfolio invested in each period.

*(2) "WAM Days" is calculated in the same manner as the described in footnote 1, but is based solely on the periods of time remaining until the securities held in TexPool (a) are scheduled to be repaid or (b) would be repaid upon a demand by TexPool, without reference to when interest rates of securities within TexPool are scheduled to be readjusted.

Definition of Average Monthly Yield (3)

*(3) This current yield for TexPool Prime for each date may reflect a waiver of some portion or all of each of the management fees.

The NEWS

Investing Bond Proceeds

At Public Trust Advisors we take a thoughtful approach built over years of experience investing bond proceeds and will happily work with you based on your specific situation. There is no one size fits all for investing bond proceeds - like any other investment it needs to be guided by both the needs of the underlying public entity and the complexities of the investment marketplace.

The only thing that is true for all situations is that one wrong move and you could violate the public trust that is bestowed upon you. Public Trust Advisors implements a comprehensive investment solution for managing bond proceeds that is anchored in the key tenants of public funds investing: Safety, Liquidity and Yield.

Five things you should consider when investing bond proceeds:

1. Waiting for a draw schedule from the construction manager may reduce interest income.

While having an accurate draw schedule is important, entities may begin investing a portion of their construction funds utilizing the "completion date" method and working backwards to build a ladder with a portion of the funds.

Once the construction manager provides the official draw schedule, one can put remaining funds to work along the investment ladder accordingly.

Even when you receive a copy of the official draw schedule, rest assured, it will change. Large construction projects are too complex to predict. Amongst other factors, they are attempting to predict weather, material costs, soil samples and future presidents; hence, they are not always correct!

2. Too much liquidity can be inefficient.

Many entities tend to keep too much liquidity on hand. This problem becomes compounded when securities mature from the investment ladder and are not needed to fund current expenses. It can be beneficial to pay

construction expenses twice monthly. This will allow the entity to better time and plan for checks leaving the building for the construction project. If you are constantly paying expenses, things can get complicated.

3. Do not just focus on today; focus on maximizing interest income over the life of the construction program.

Many entities focus on today's "best rate" and fail to adequately search for the best rates over the life of the construction program. This is especially important when securities mature and the proceeds are not needed.

Often times, investors let the funds sit in cash, earning nearly zero, when the funds could be redeployed further out in maturity structure potentially earning additional yield.

4. Should I hire an investment advisor to help invest the proceeds?

A registered investment advisor can bring a lot to the table when it comes to managing bond proceeds. Because the construction program is dynamic and constantly changing, an advisor can be continually scouring the investment marketplace for investment opportunities that may fit into the investment program.

If an entity has a full-time staff professional dedicated exclusively to investing, the entity can certainly invest the bond proceeds without an investment advisor. Sometimes, public entities use both internal professionals and external experts, especially on large sophisticated projects.

5. What happens after I invest the bond proceeds?

We often joke that investing is the easiest thing to do when investing bond proceeds. It can be more important to develop accurate and in depth reports that can be shared with the School Board or governing body.

The **ECONOMY**

Rebound Ahead?

The U.S. economy continues to wobble along, shrinking at a 0.7 percent annualized rate during the first quarter. Some of the headwinds, such as the harsh winter weather and disruptions at the west coast ports, are clearly behind us. What remains, is a stronger dollar that dampens net exports and a consumer that appears content to pocket rather than spend the savings derived from lower fuel prices. Recent comments from the Federal Reserve (Fed) reflect optimism that the economy will rebound in the second quarter, although not as strongly as last year.

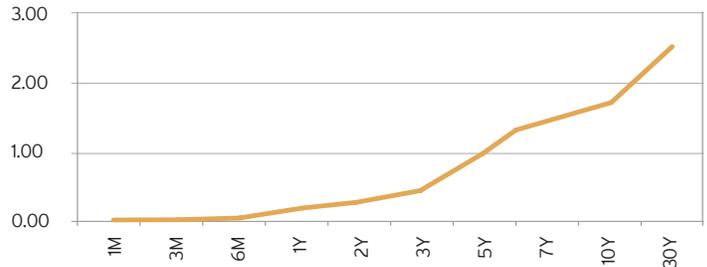

The Fed has expressed a desire to normalize interest rates in the near future, focusing solely on the underlying economic data to guide its decisions. However, with the economy growing in fits and spurts any increase to the federal funds target rate is likely to be slow and gradual, rather than a “lift off” akin to a rocket launching into space. As for the timing of the first rate hike, the Fed has not taken June off the table. Given the sluggish economic backdrop, the market is not pricing an increase until later this year.

On a positive note, the housing market has shown surprising signs of life as of late. Typically the housing market springs to life early in an economic cycle, as the low interest rates that coincide with the start of a recovery supports affordability. Tighter credit conditions and falling home prices stemming from the global financial crisis may have delayed the rebound in housing this time around. With new home sales and building permits surging near post-recession highs, there are a few more reasons to think that the economy may indeed rebound yet again this year.

Portfolio Strategy

Short-term rates continued to be well anchored by the Fed’s zero interest target rate policy. However, we are preparing for the Fed to eventually lift rates in the second half of 2015. As always, we remain focused on safety, liquidity and then yield. Texas CLASS is rated AAAM by Standard & Poor’s.
